

LINKUS UC CLIENTS

Stay Connected Anywhere Anytime

Linkus is a unified communications app for Web Browsers, iPhone, Android Phones, Windows Desktop, and Mac Desktop. Designed for Yeastar PBX System, it transforms your desktop and mobile phone into a fully-featured office extension, provides convenient call experience, and offers powerful collaboration features like presence, instant messaging, contacts management, CRM integration, etc.

Yeastar Linkus UC Clients meets your daily communications needs from virtually any devices:

- Calling
- Chat
- Meetings and Collaboration
- Contacts Management
- File Sharing
- Visual Call Dispatching on Web
- Call Center Management on Web

Bring Your Extension with You

Make and receive enterprise VoIP calls on your computer and mobile phones while enjoying all the office extension features. Also benefit from true one number reach which keeps your personal numbers private and have instant access to corporate and personal contacts.

Manage and Control Your Calls

Transfer, hold, mute, and record a call to any phone number or extension on the intuitive user interface. You can also see missed calls, check call history, manage voicemails and recordings, and set up call forwarding rules and ring strategy settings easily on Linkus.

Consolidated Collaboration

Go beyond voice communications. Start an audio/video meeting, initiate personal/group chats, share files, see presence status of your co-workers, search and manage business contacts, integrate 3rd-party CRMs ... get all you need to consolidate team collaborations with a single click/tap.

GO BEYOND VOICE COMMUNICATIONS

Video

Meet face-to-face with anyone instantly and securely straight from web browsers. Linkus Web Client supports integrated Video Conferencing, in-meeting team chat & screen sharing to make remote team meetings easy and engaging.

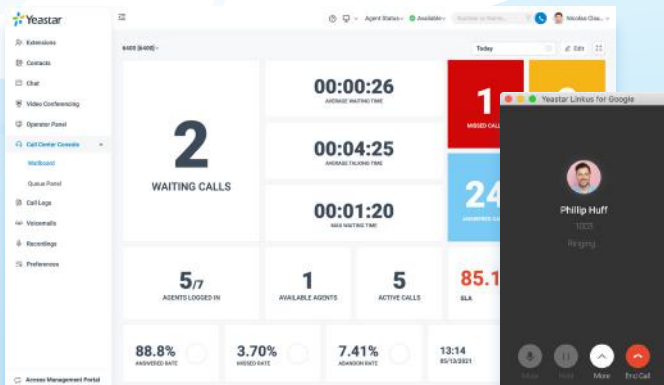

Presence

See who is available, offline, away, on a call, do-not-disturb, in a break or trip immediately with colored presence indicators. You can also customize your availability status description to convey your custom messages.

CRM Integration

Call popup and call journals come with easy CRM integrations on Linkus Desktop Client: Microsoft Dynamics 365, Google Contact, and more.

Messaging

Click to start 1:1 or group chat with co-workers. Liven up your text conversations with emojis, pictures, and file sharing. Your messages are auto-synced across clients and can be quickly retrieved with chat history search.

Contact Management

Enjoy ultimate convenience with PBX-native contacts management. Easily add, edit, search and manage your corporate or personal contacts that sync across clients, benefit from caller ID match, and facilitate speed dial.

Chrome Extension

Never miss a business call and enjoy one-click dialing to any phone numbers on your web browser. [With Yeastar Linkus for Google Chrome Extension](#), every phone number on the web is converted to a clickable link.

More Values on Linkus Web Client

Enable productivity gains with exclusive **Operator Panel** and **Call Center Console** supports on Linkus Web Client. Get complete control of company-wide calls and queue activities with dynamic switchboard-type panels that integrate real-time call/queue performance info, employee availability, and advanced call control functions like drag-and-drop routing, call transfer, hold, park, etc. in one single interface.
