

Avaya Vantage™ K175

Seamless communication experiences, designed for work from anywhere

In today's digital workplace, we're all doing things a bit differently. And we love the tools that make it easy, that streamline our day and do it efficiently. Work is increasingly unplanned. Decisions need to be made in a constantly changing environment. Avaya Vantage™ is there to pull it all together.

Avaya Vantage™ is an all-glass, touch screen, Always-On desktop video device with an intuitive user interface, plug and play installation—designed for an easy out-of-the-box experience for you. It has a small footprint on your desktop. You are all set to work from anywhere in a matter of minutes. It is a high-definition video and collaboration device natively attached to Avaya services and supports 3rd party video and collaboration services. Its built-in communication experience provides simple, instant, seamless & natural engagement. Users can fire up video, voice, chat, collaboration instantly through one touch connections with no unnatural breaks or pauses—eliminating the need to manage multiple devices in order to engage.

Experience an immersive digital workplace that is equipped with the right device and services increasing your efficiency and productivity manifold. You no longer need to scramble between various devices to get things done—free your laptop, and do all of it on your Avaya Vantage™.

Powered by state of-the-art Avaya technology, Avaya Vantage™ is the desktop device that enables high resolution video contextual communication-driven experiences that are relevant to your specific industry. Experience a collaboration device that takes engagement to a whole new level.

Stay on top of your meetings with Vantage calendar actively notifying on upcoming meetings with just one-click to connect. Combined with Avaya Spaces™ you can instantly send messages to your various teams or to your direct contacts. Create a project space, check in anytime, converse from anywhere. Debate, brainstorm, align, update; get the clarity, excitement, and empathy that's possible when you meet face to face. Even extend your Vantage experience to an external display using a micro HDMI port. When using the Avaya Vantage built-in communication or Avaya Spaces™ one can extend the video, content sharing or both video and sharing (split view) to an external display.

The Android™ based new Vantage is faster, powerful, engineered for audio and video quality. Equipped with Avaya communication SDK, you can build your organization work flows and processes into applications combining Avaya communication services; Get the best experience with this device to increase productivity and accelerate your processes. Leverage the device NFC, Bluetooth, HDMI and USB connections to extend your use cases.

This device is perfect for making phone calls, video conferencing, collaboration, those working from home or office locations, knowledge workers and so much more.

Key Features and Benefits

Video and Collaboration in one-click

Native experience for high definition video and collaboration. Avaya Vantage™ built-in UC experience provides access to communication features, such as audio and video telephony, conferencing, calendar. The built-in calendar provides a single-click connection to Avaya or 3rd party services as well as notification for the upcoming meetings. Use Avaya Vantage™ to conduct all your video and collaboration in just one-click. Extend your native Avaya experience over HDMI to external screen to provide a picture by picture view of video and content you are sharing.

Work from anywhere.

Whether you are working from home or from an office location, Avaya Vantage™ can easily connect to your organization's communication cloud or premises-based services. It provides an easy out of the box experience so a home worker can easily deploy and connect seamlessly. Use Avaya Setup Wizard with automatic configuration based on your corporate email address and start using your video and collaboration services in no time.

Avaya Spaces™ integration

Avaya Spaces is a cloud-based team collaboration and meeting application that seamlessly integrates digital calling, video, tasks, sharing, and more into your browser or the Spaces application. Avaya Vantage™ comes with the Avaya Spaces application installed on it. Avaya Spaces is integrated with Avaya Vantage™ built-in UC experience for a quick access to the Avaya Spaces application or to get a notification or join a Spaces meeting from the Calendar tab.

Open Avaya Spaces dashboard, join a meeting, send video and presentation to an external screen using the Avaya Vantage™. User can tap to send video to external monitor which displays the video with all call participants or send presentation to external monitor which displays the presentation and the Avaya Vantage™ screen displays the video with all call participants. Or even send both video and presentation to external monitor which shows the external screen split in half. One half of the screen displays the presentation, the other half displays the video with all call participants.

Contemporary Form Factor

All glass, innovative-Avaya Vantage™ is a cutting-edge desktop device. With its large touch screen display, no visible mechanical buttons; it sets the stage for futuristic devices that surpass traditional ones at all levels—pushing the boundaries of a new desktop user experience. It has a small footprint on the desktop, is simple and easy to deploy, could be wall mount or just placed on a desk and comes with an optional / detachable cradle with cordless / corded handset. Avaya Vantage™ is an expression of the next generation of dedicated engagement devices that mesh brilliantly with today's mobile workflows.

Avaya Vantage™ is built for acoustic excellence and performance in a dedicated device, engineered for audio and video communications that is always on, in-reach, and ready. It embodies enterprise quality audio, making it an excellent communications device for audio and video calling, and application integration. Designed for an immersive conferencing and collaboration. It delivers an easy-to-use, full-featured voice & video communications experience on Avaya Approved Third party hosted call control infrastructure.

Verticals focus: Use-Cases

Avaya Vantage™ is also very well-suited for vertical markets such as hospitality, healthcare, retail, government, education, media & entertainment where it creates opportunities for communications as a contextual part of workflow applications.

It is highly customizable and empowers the users with Avaya Breeze™ Client SDK, a software development kit to embed communications features into workflow-based business applications.
